

Part 2 - Restocking Conditions

Condition A: Restock on felled area.

The following conditions apply to the licenced felling in 1g, 2c, 3d.

1. Before 30th June of the second year following felling the land on which the felling took place must be:
 - a. prepared ready for planting and planted and protected in accordance with good forestry practice
 - b. Planted with 30% small-leaved lime 20% sycamore 20% silver birch 10% wild cherry/gean 10% hornbeam 10% field maple to achieve not less than 1600 stems per hectare evenly distributed over the site
2. For a period of 10 years from the planting:
 - a. The plants must be protected against damage and be adequately weeded.
 - b. Any failure or losses should be replaced as necessary to provide a stocking of not less than 1600 stems per hectare evenly distributed over the site.
 - c. Any replanting must be maintained in accordance with the rules and practice of good forestry.

Condition C: Restock by Natural Regeneration or Coppice.

The following conditions apply to the licenced felling in 1h.

1. The land on which the felling took place is to be managed in accordance with the rules and practice of good forestry so as to secure restocking with 30% small-leaved lime 20% sycamore 20% silver birch 10% wild cherry/gean 10% hornbeam 10% field maple to achieve not less than 1600 stems per hectare evenly distributed over the site by 50% natural regeneration and 50% replanting
2. All licenced trees felled are to be removed quickly and carefully so as to avoid damage to the remaining trees or seedlings or coppice shoots.
3. The land is to be adequately prepared and the young trees are to be protected against damage and weeded during the period of restocking.
4. If before 30th June by the end of the second growing season after felling the restocking described in 1. above is not achieved then the land is to be planted or sown before 30th June of the third year after felling in order to secure a stocking of not less than 1600 stems per hectare of 30% small-leaved lime 20% sycamore 20% silver birch 10% wild cherry/gean 10% hornbeam 10% field maple evenly distributed over the site.
5. For a period of 10 years from the restocking:
 - a. The plants must be protected against damage and be adequately weeded.
 - b. Any failure or losses should be replaced as necessary to provide a stocking of not less than 1600 stems per hectare evenly distributed over the site.
 - c. Any replanting must be properly maintained in accordance with the rules and practice of good forestry.

Condition C: Restock by Natural Regeneration or Coppice.

The following conditions apply to the licenced felling in 3b.

1. The land on which the felling took place is to be managed in accordance with the rules and practice of good forestry so as to secure restocking with 20% native broadleaves 20% field maple 10% sycamore 10% silver birch 10% hazel 10% beech and 20% open ground to achieve not less than 1600 stems per hectare evenly distributed over the site by 100% natural regeneration
2. All licenced trees felled are to be removed quickly and carefully so as to avoid damage to the remaining trees or seedlings or coppice shoots.
3. The land is to be adequately prepared and the young trees are to be protected against damage and weeded during the period of restocking.
4. If before 30th June by the end of the second growing season after felling the restocking described in 1. above is not achieved then the land is to be planted or sown before 30th June of the third year after felling in order to secure a stocking of not less than 1600 stems per hectare of 20% native broadleaves 20% field maple

10% sycamore 10% silver birch 10% hazel 10% beech and 20% open ground evenly distributed over the site.

5. For a period of 10 years from the restocking:

- a. The plants must be protected against damage and be adequately weeded.
- b. Any failure or losses should be replaced as necessary to provide a stocking of not less than 1600 stems per hectare evenly distributed over the site.
- c. Any replanting must be properly maintained in accordance with the rules and practice of good forestry.

Part 3 - Additional Advisory Information and Guidance

This licence is issued in summary relating to the Management Plan referenced 38545 Chesham Bois Parish Council Woodlands and associated 019_90_2019 Chesham Bois Parish Council Woodlands 38545 Final Plan of Ops and 019_90_2019 Chesham Bois Parish Council Woodlands 38545 Final Maps.

Full details of the felling and restocking conditions agreed under this licence can be found in the above mentioned Plan of Operations and maps which must be attached to this licence at all times.
